

Mishal Yadav

Senior / Lead DevOps Engineer

+971 58 593 9475 | mishal2875@gmail.com | linkedin/MishalYadav | Abu Dhabi, UAE | Currently based in the UAE | Visa: Employer (Transferable)

PROFESSIONAL SUMMARY

Senior DevOps / Platform Engineer with **7+ years** architecting, automating, and operating cloud-native infrastructure, anchored in deep **Azure** expertise (AKS, Entra ID, Azure DevOps, Bicep, Key Vault) with complementary GCP breadth. Strong hands-on experience running **production Kubernetes at scale**, sustaining 99.9% uptime across multi-cluster environments, and engineering end-to-end **CI/CD, automation, and observability** pipelines that cut deployment time by 30%. Solid **software development** (Python, shell scripting) and **networking** foundation (TCP/IP, VPN/IPSec, VNet peering, private endpoints), an **Agile** delivery mindset, and a continuous-learning approach to emerging platform and cloud-native tooling. Currently based in Abu Dhabi, UAE.

PROFESSIONAL EXPERIENCE

Senior DevOps Engineer

Jan 2026 – Present

Abu Dhabi Commercial Bank (ADCB) — Abu Dhabi, UAE

- Operate **production Kubernetes (AKS / GKE)** multi-cluster platforms, defining and tracking SLOs/SLIs and automating scaling to sustain **99.9% reliability** for critical banking services.
- Architected Azure-first multi-cloud infrastructure as code using **Bicep and Terraform** with versioned modules and workspace-separated environments, reducing infrastructure spin-up time to under 20 minutes.
- Engineered end-to-end CI/CD pipelines across **Azure DevOps, GitHub Actions, and Bitbucket Pipelines**, reducing deployment time by 30% and sustaining a 100% successful deployment rate across all environments.
- Automated deployment and scaling via **Helm and Argo CD (GitOps)** with HPA and Cluster Autoscaler, delivering zero-downtime releases and consistent environment parity across all clusters.
- Hardened container build pipelines with image scanning, SBOM generation, and pinned base images, ensuring **zero HIGH/CRITICAL CVEs** reach production.
- Delivered within **Agile / sprint-based** cross-functional teams, driving observability through Azure Monitor, Prometheus, and Grafana to improve incident response and release confidence.

DevOps Engineer

Mar 2023 – Dec 2025

Enboarder LLC — Noida, India

- Managed SLOs/SLIs for critical services across **OpenShift and Kubernetes** multi-cluster environments, automating deployment and scaling to sustain high availability across 10+ production clusters.
- Built CI/CD pipelines using **Jenkins, GitLab CI, Terraform, and Ansible**, reducing deployment time by 30% and ensuring 100% successful deployments across all environments.
- Delivered zero-downtime releases via rolling updates with **Helm and Argo CD**, leveraging HPA and Cluster Autoscaler for consistent environment parity across production workloads.
- Developed automation in **Python and shell scripting** to eliminate manual toil, targeting a 20% reduction in repetitive operational tasks.
- Monitored cloud resources with **Prometheus, Grafana, Azure Monitor, and GCP Operations Suite**, establishing proactive alerting and dashboards that improved SLA adherence by 15%.
- Mentored a team of DevOps engineers within an **Agile** delivery model, fostering collaboration that reduced project delays by 20%.

Cloud / DevOps Engineer

Jan 2022 – Feb 2023

Accenture Solutions Pvt Ltd — Bengaluru, India

- Engineered multi-cloud containerised platforms across **Azure AKS and Google GKE**, ensuring consistent deployment patterns, high scalability, and 99.9% system uptime for production-grade workloads.
- Designed CI/CD pipelines using **GitHub Actions** with integrated quality checks and rollback strategies, enabling faster, more reliable release cycles with a 40% reduction in failed releases.
- Secured credentials and configurations through **Azure Key Vault and Kubernetes Secrets**, integrating them into automated pipelines to eliminate plaintext exposure across all environments.
- Deployed a 3-tier cloud application using **Azure Application Gateway, Azure Front Door**, GCP Cloud Storage, and load balancers for secure, scalable end-to-end service delivery.

Cloud Infrastructure Engineer

Jan 2019 – Jan 2022

Tata Consultancy Services — New Delhi, India

- Administered 24x7x365 **Linux/Unix production servers** across internal, global, and Azure VM / GCP Compute Engine environments, maintaining 99.9% infrastructure uptime for enterprise workloads.
- Provisioned and managed Azure services (VMs, Managed Disks, Load Balancer, Azure SQL, **IAM via Entra ID**) and GCP services (Compute Engine, Cloud SQL, Google IAM) for scalable, secure global infrastructure.
- Configured and troubleshot web, database, and application services including **Nginx, Apache, MySQL, and RHCS clustering**, resolving Tier 2 incidents and reducing mean time to resolution by 25%.
- Implemented **networking and security** protocols — TCP/IP, VPN/IPSec, SSL/TLS, Azure VNet peering, private endpoints, and GCP VPC connectivity — strengthening hybrid connectivity and perimeter security across global environments.

CORE COMPETENCIES

- | | | |
|--------------------------------------|----------------------------------|--|
| • Production Kubernetes (AKS / GKE) | • Azure Cloud & Azure DevOps | • CI/CD Pipelines & GitOps (Argo CD) |
| • Terraform & Bicep (IaC) | • Helm & OpenShift | • Observability (Prometheus / Grafana) |
| • Azure Monitor & GCP Ops Suite | • GitHub Actions & GitLab CI | • Python & Shell Automation |
| • Azure Entra ID & Google IAM (RBAC) | • Networking (TCP/IP, VPN, VNet) | • Agile & Cloud-Native Delivery |

EDUCATION

B.E. Electronics & Telecommunication — First Class with Distinction

Jul 2014 – Jun 2018

STES' Smt. Kashibai Navale College of Engineering, Pune University — Pune, India
